NOTICE
COMMON FILL AVAILABLE @ HIGHWAY DEPT.
70 ELM STREET
SEPTEMBER 30, 2009

The Highway Department has a significant quantity of Common Fill available. The fill is comprised of excavated material from the streets where drainage works and water main work was performed. The Common Fill is not uniform and is comprised mainly of silty sand with stones, and asphalt present. Size of stones is approximately 12". Size of asphalt is approximately 24" square and 4" thick. Larger sizes could be present.

The Common Fill cannot be used as road base material and has been deemed expendable. The Highway Department is seeking contractors that could use this material as Common Fill. Contractors could use the Highway Yard for screening if deemed necessary. However, no material of any kind can be brought into the Highway yard. Also, there shall be no stockpiling of screened material for future use. Preferably a contractor could remove all the material in one single operation or period. Material would only be available during periods when Highway Department personnel are present.

The Highway Department shall entertain any and all proposals for the removal of this material.

Should you have any questions or wish to view the Common Fill please call the Highway Department at 508-543-1228.
